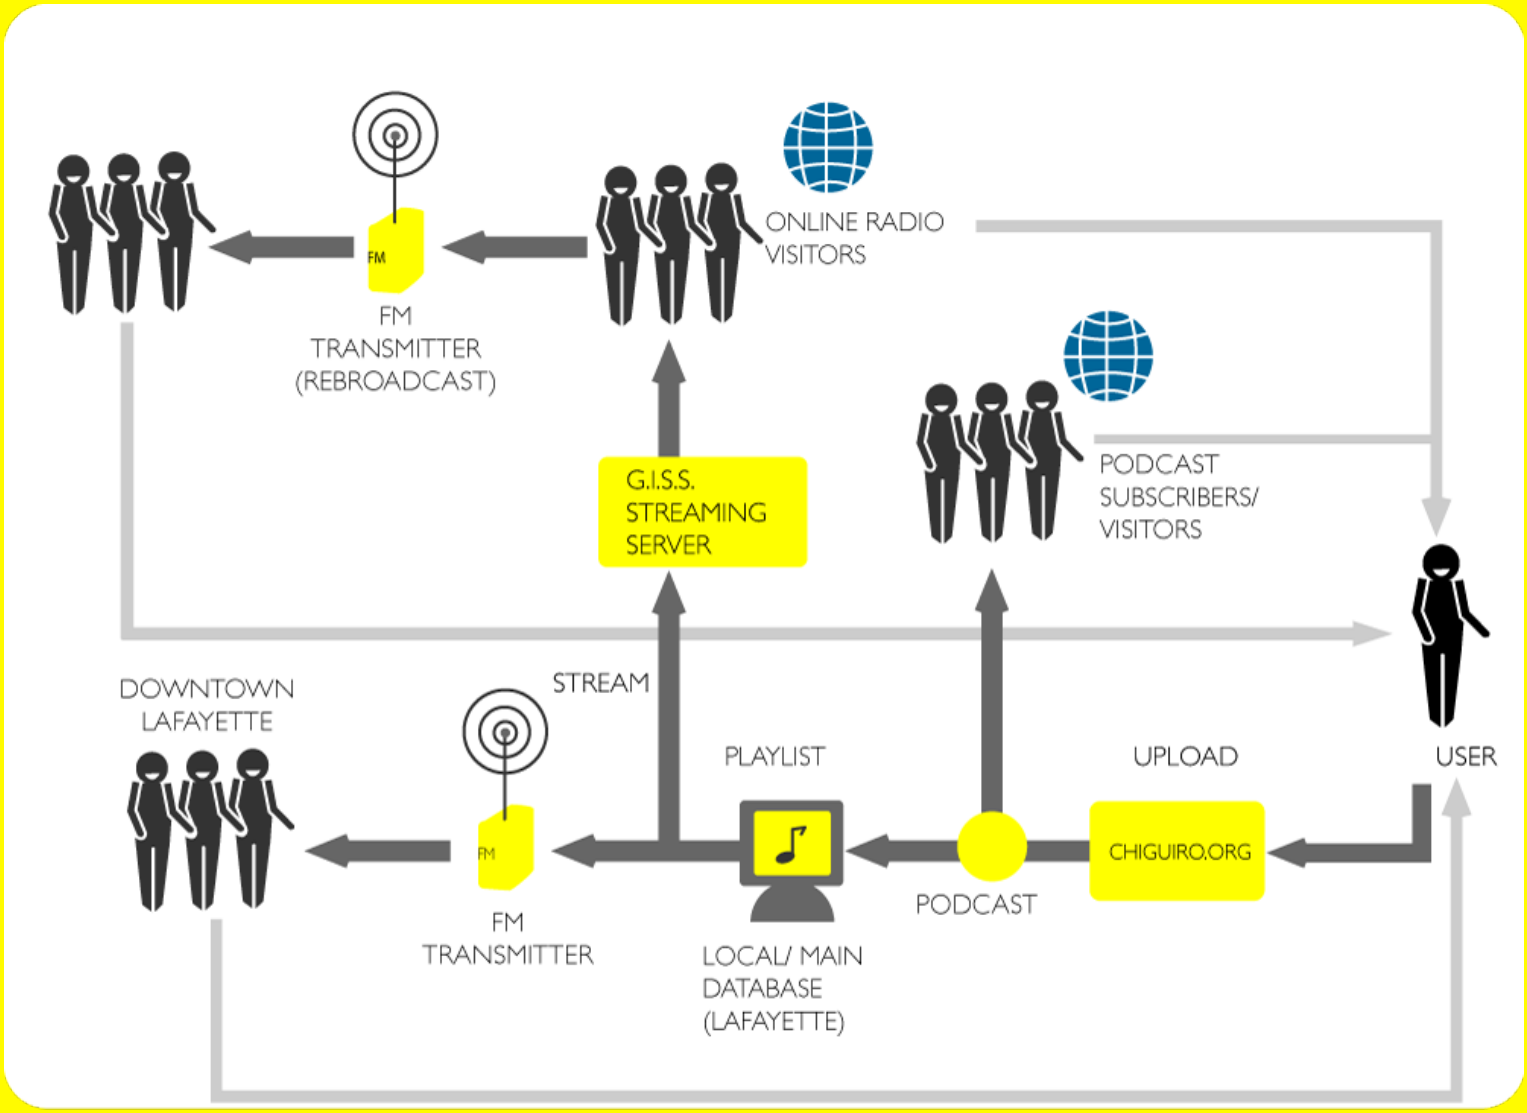
RADIO CHIGÜIRO

Radio Chigüiro was a social platform for the distribution of Lafayette, Indiana's “glocal” culture. It operated as a community radio, exploring youth practices associated with parties, live music shows, and free radio workshops by using a web site as a medium for contact, production and participation.

HOTBOX



STRUCTURE OF RADIO CHIGUIRO

WE ARE ALL USERS. USERS ARE BROADCASTERS

RADIO CHIGUIRO

2006-2009

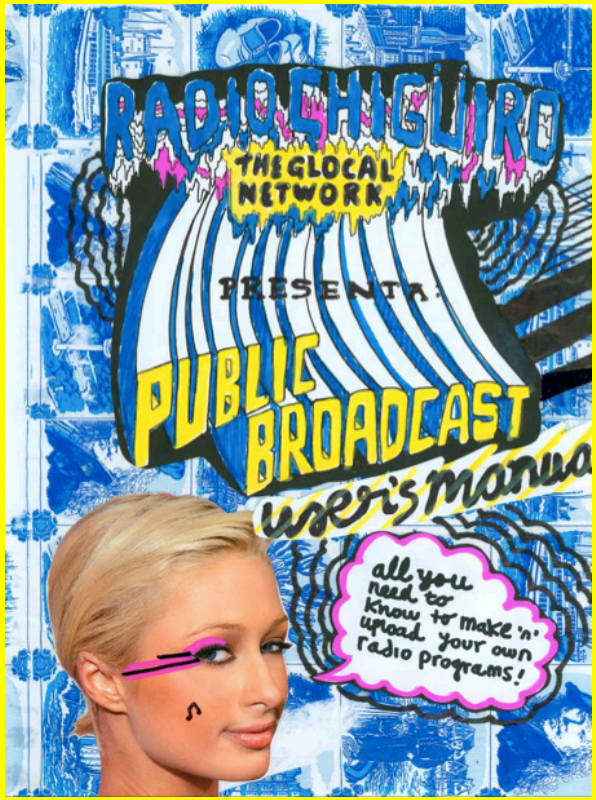
- React to copyright
- Reclaim the airwaves
- Encourage local music production / scene
- Create new venues and channels

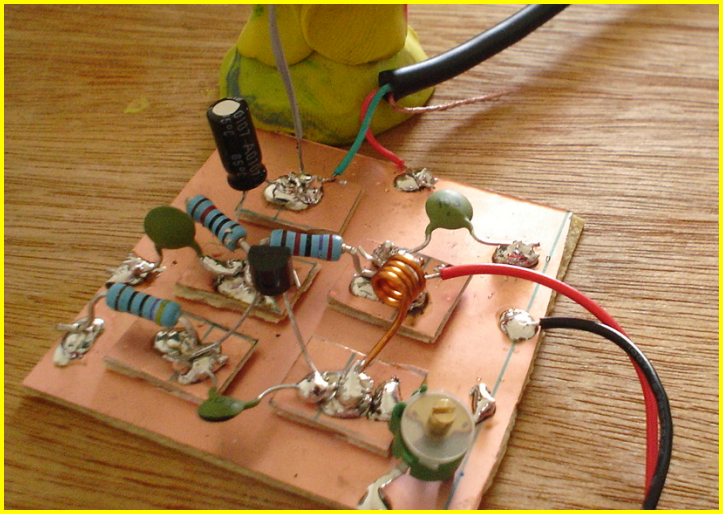
"I GOT NAILED FOR VANILLA ICE"

RADIO CHIGUIRO

2009- Today

- Foster new radios
- Radio archives
- Workshops





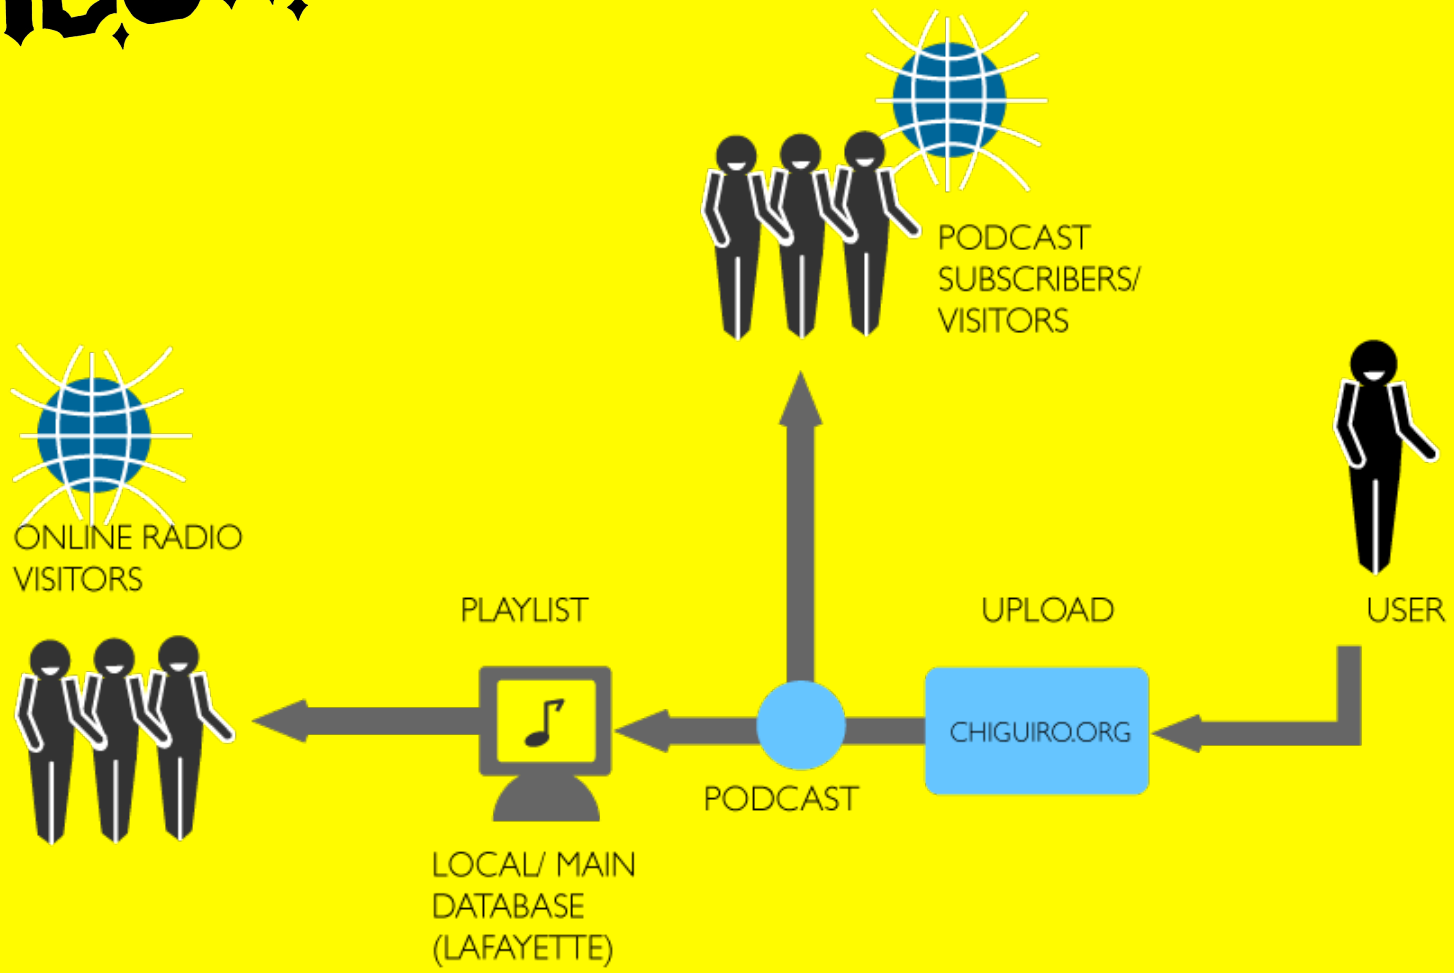
RADIO CHIGUIRO

Workshop

Using basic computers, participants will learn to produce their own radio programs. The objective of the workshop is to instruct in easy and free resources for audio recording, editing and broadcasting.

RADIO CHIGUIRO

Workshop



RADIO CHIGUIRO

Materials

- Mini-plug cable (1/8’)
- Recording software
- LAME encoder
- FTP client
- Podcast Generator

RADIO CHIGUIRO

Materials

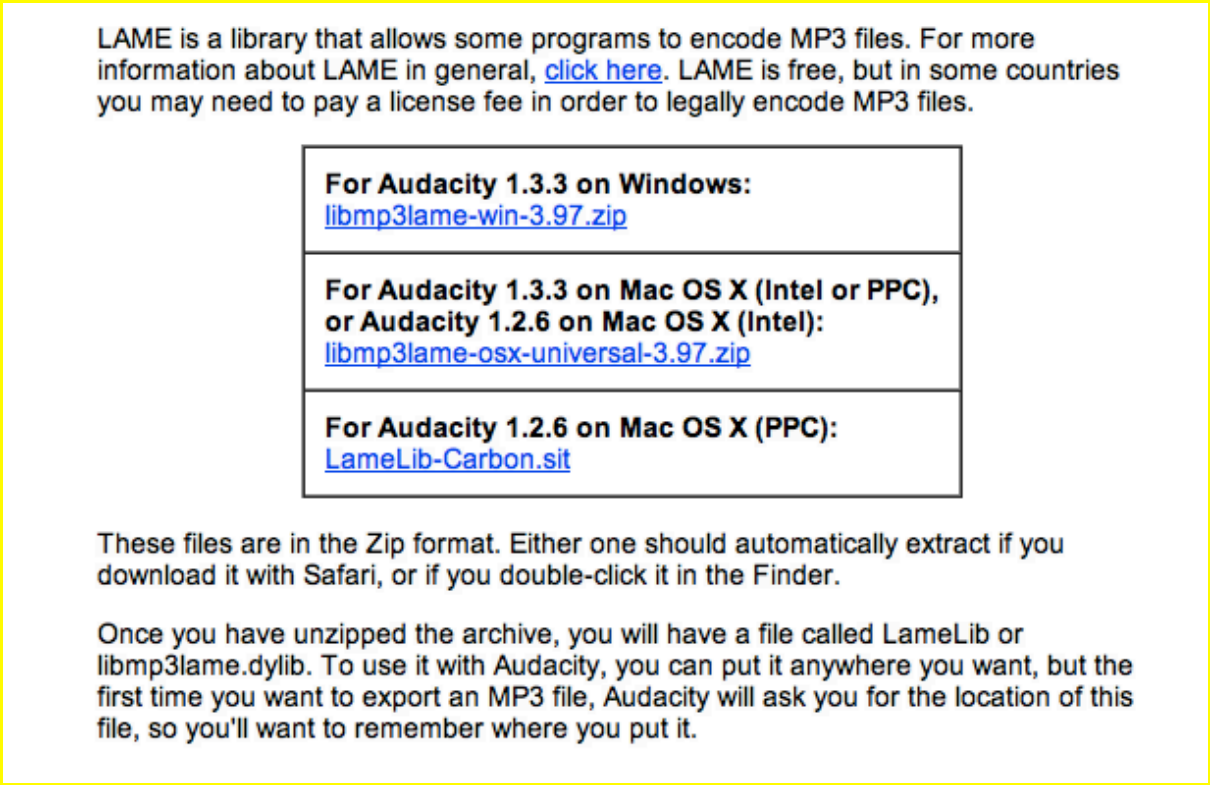
http://spaghetticode.org/lame/



LAME is a library that allows some programs to encode MP3 files. For more information about LAME in general, click here. LAME is free, but in some countries you may need to pay a license fee in order to legally encode MP3 files.

For Audacity 1.3.3 on Windows: libmp3lame-win-3.97.zip
For Audacity 1.3.3 on Mac OS X (Intel or PPC), or Audacity 1.2.6 on Mac OS X (Intel): libmp3lame-osx-universal-3.97.zip
For Audacity 1.2.6 on Mac OS X (PPC): LameLib-Carbon.sit

These files are in the Zip format. Either one should automatically extract if you download it with Safari, or if you double-click it in the Finder.

Once you have unzipped the archive, you will have a file called LameLib or libmp3lame.dylib. To use it with Audacity, you can put it anywhere you want, but the first time you want to export an MP3 file, Audacity will ask you for the location of this file, so you'll want to remember where you put it.
